CLAIMS

1. A method for facilitating complex familial interactions, comprising the steps of:

   providing an internet-accessible database and functions;

   enabling access by users to said database and functions; wherein any user may specify additional users to be members of a personal community of the user;

   enabling one or more members of a personal community to share information with one or more other members of the community.

2. The method of claim 1, wherein a specifying user may remove a specified member from the user's community.

3. The method of claim 1, further comprising the step of:

   enabling a user as a payor to order payment to another user as a payee;

   debiting an account of the payor for an amount to be paid to payee; and

   crediting an account of the payee of the amount.

4. The method of claim 1, wherein the specifying user further specifies what information is to be shared with each one of said one or more members.

5. The method of claim 1, wherein the information to be shared includes data relating to conformance with a court order.

6. The method of claim 5, wherein the data concerns child visitation.

7. The method of claim 5, wherein the data concerns child support payments.
